HandMade

To create her luminous contemporary glass sculptures, artist Eva Miinkovic uses her hands from start to finish — from shaping hot glass with tools, to carefully grinding each piece.

Miinkovic's slender glass TUBES feature a vibrant color, long-lasting by day to glow in the accident orange.

Style Snapshot Professional glass blower Eva Miinkovic has been working full-time in Canada and abroad with her artistic glass sculptures since 2004. Working from her Windsor, Ont. studio, Toronto's Gossards (www.gossards.com), Miinkovic is inspired by the purity of contemporary residential architecture and design. She uses her hands daily to transform hot glass and custom glass into objects of beauty, and while she admits to working her hands constantly, Miinkovic realizes that getting them dirty is part of the artistic process. "It's just my true nature and we wanted to find" she confesses. Visit Miinkovic at the Spring One of a Kind Show, Toronto (March 20 to April 3) www.oneofakindshow.com

Hands On. Dry hands can lose 22% of their natural moisture every time you wash them. Dove's advanced Cool Moisture Nourishing Hand Wash that contains active moisturizing ingredients with the scents of green tea and cucumber, so hands are clean and soft.
